GOVERNMENTS DIVISION

Sharman Landau, Chief

ACKNOWLEDGMENTS—This report was prepared in the Governments Division by the Employment Branch, headed by **Alan V. Stevens**, under the general direction of **Alan R. Jones**, Assistant Division Chief for Special Governmental Statistics. **Dean Wilkinson** and **Bern Bonifant** of the Employment Branch served as project directors and were assisted by **Donna Tracy**.

Data for major local governments were reviewed and assembled in the Governments Division by the Western Sector Branch headed by **Richard J. Neach** and the Eastern Sector Branch headed by **Howard S. Salas**. Data Preparation Division, **Donald Adams**, Chief, was responsible for the review and assembly of all other local government data.

Data processing operations were directed by **Jawel Dannis** of the Governments Division's Computer Utilization staff and carried out by the Computer Services Division.

Publication copy was prepared in the Governments Division under the supervision of **Helen D. Filas**. Publications Services Division provided advice and service in the preparation of copy for publication.

Grateful acknowledgment is made of the cooperation of thousands of local government officials who provided information and other assistance for preparation of this report.

For further information regarding data contained in this report, contact **Alan V. Stevens**, Governments Division, Bureau of the Census, Washington, D.C. 20233 (Area Code 301, 763-5086).

INTRODUCTION

Although the 74 largest standard metropolitan statistical areas (SMSA's) contain only 18.3 percent of all local governments in the United States, they had 54 percent of all local government employment in October 1975 when 4.8 million people were employed.[1] Local governments in these 74 SMSA's had October 1975 payrolls of $4,397 million or 63 percent of all local government payrolls. Reflecting similar findings for private sector employees, the full-time employees of local governments inside these 74 SMSA's had considerably higher average earnings in October 1975 ($1,074) than employees of local governments outside these areas ($810).[2]

Slightly less than one-fifth of all persons counted as paid local government employees within the 74 largest SMSA's were employed on a part-time basis. When the number of these employees is calculated in terms of full-time earning rates, the full-time equivalent employment in October 1975 was 4.1 million.[3]

Approximately 113 million persons, or 54 percent of the population of the United States, reside within these 74 largest SMSA's in 1973. Thus, the ratio of local government full-time equivalent employment to population in these SMSA's was 424 per 10,000 population.

The 1972 Census of Governments shows that these 74 largest SMSA'S contained more than 14,300 local governments. The number of local governments per SMSA ranged from four local governments in the Honolulu, Hawaii SMSA to 1,172 local governments in the Chicago, Illinois SMSA. Table D on page 5 provides a convenient summary listing of the 74 SMSA's covered in this report and shows the 1973 population and number of local governments within each SMSA.

Approximately one-half of the October 1975 full-time equivalent employment in these major SMSA's, about 2.1 million, was in the education function. Table A presents the functional distribution of local government employment within the 74 SMSA's as of October 1975.

As shown in table 1, about 69 percent of local government education employees within these 74 major SMSA's are classified as teachers. School systems canvassed were asked to include under this heading not only teachers, but also teacher aides, principals, supervisors of instruction, school librarians, and guidance personnel. Other employees of public schools include administrative and clerical personnel, plant operation and maintenance employees, and any bus drivers, lunchroom, health, and recreational personnel, and student employees.

Table A. **Local Government Employment in the 74 Largest SMSA's, by Function**

Function	Full-time equivalent employment	
	Number (thousands)	Percent
Total	4,121	100.0
Education	2,100	51.0
Police protection	310	7.5
Hospitals	241	5.8
General control	152	3.7
Local utilities other than water supply	146	3.6
Fire protection	136	3.3
Highways	129	3.1
Public welfare	120	2.9
Parks and recreation	100	2.4
Sanitation other than sewerage	72	1.8
Financial administration	71	1.7
Health	70	1.7
Water supply	63	1.5
Correction	54	1.3
Housing and urban renewal	54	1.3
Sewerage	47	1.1
Libraries	42	1.0
All other functions	215	5.2

[1]Electric power, transit, and gas supply systems.

The general control function is comprised of the legislative bodies, courts, the chief executives, and central staff agencies of governments. The police and fire protection categories include not only uniformed forces, but also administrative and clerical employees concerned with these services. Sanitation other than sewerage refers to street cleaning and to refuse collection and disposal. Financial administration pertains to central financial agencies and activities, including tax administration and central purchasing. The highway function comprises all activities for construction and maintenance of streets, sidewalks, bridges, etc., but not street cleaning (under sanitation other than sewerage) or traffic control (under police protection). In addition to the administration of the more familiar income maintenance programs such as aid to dependent children, aid to the blind, etc.,

[1] The areas of the 74 SMSA's included in this report are in terms of their respective boundaries according to the October 1975 definitions of the U.S. Office of Management and Budget. All population figures are estimates for July 1973.

[2] For further information on incomes other than for public employees, see U.S. Bureau of the Census, Current Population Reports, Series P-60, No. 101, Money Income in 1975 of Families and Persons in the United States, U.S. Government Printing Office, Washington, D.C. 1976.

[3] Full-time equivalent employment is a computed statistic representing the number of full-time employees that could have been employed if all personnel were engaged on a full-time basis at the average monthly pay applying to full-time workers. It is calculated, for a particular function of a government, by dividing the average monthly pay for full-time employees of that function into the total pay for all full- and part-time employees in the function.

the public welfare function includes activities such as social service casework and the operation of homes for the elderly and other indigent care institutions. However, health care and hospital services provided directly by a government are excluded from the public welfare function and classed under "Health" or "Hospitals." The hospital function relates only to government-operated facilities providing in-patient medical care. The health function is applied to the administration of public health programs, community and visiting nurse services, clinics, water pollution control, immunization programs and other related activities.

Table B presents a comparison of the functional distribution of full-time equivalent employment per 10,000 population between local governments within the 74 largest SMSA's and all other local governments in the United States.

Table B. **Comparison of Local Government Employment Inside and Outside the 74 Largest SMSA'S**

Function	Full-time equivalent employment per 10,000 population	
	Inside 74 largest SMSA's	Outside 74 largest SMSA's
Total	363.0	335.6
Education	185.0	197.2
Police protection	27.3	17.2
Hospital	21.2	22.6
General control	13.4	12.0
Local utilities other than water supply	12.9	4.1
Fire protection	12.0	8.1
Highways	11.3	17.6

DATA FOR COUNTY AREAS AND MAJOR LOCAL GOVERNMENTS

Table 2 presents local government employment and payroll statistics for each of the largest SMSA's and their component county areas. Table 3 presents figures on the number of local government employees per 10,000 population for these SMSA's and county areas.[4]

In interpreting tables 2 and 3, it is important to note that the employment and payroll data presented are data for county areas (i.e., the summation of data of all local governmental units contained within the geographic boundaries of a county) and not for individual county governments. There is considerable interstate diversity in the role of the various types of local governments and in arrangements for the administration and provision of particular governmental services. For example in some States local education is provided by dependent agencies of counties or municipalities, whereas in other States local education is provided by independent school districts. Likewise, responsibility for the provision of hospital and local utility services may be assigned to municipalities in some States and to special district governments in other States. In order to minimize the effect of this diversity on local government statistical data, it is preferable to present the data on a county area basis rather than by type of local government.[5]

Individual government data for the central city and central county governments of each of the 74 SMSA's are shown in table 4.[6] In addition, data for certain large school district and special district governments that represent a significant percentage of their SMSA's total employment and payrolls are presented in this table.

LARGE COUNTY AREAS OUTSIDE THE 74 LARGEST SMSA's

Table 5 provides statistics on local government employment and payrolls in October 1975 for 68 large county areas which are outside of the 74 largest SMSA's.[7] Table 6 provides statistics on the number of local government employees per 10,000 population in each of these 68 county areas. As with tables 2 and 3, the statistics in these tables apply to the aggregate of local governments in the county area and do not apply to the individual county government.

---

[4]Standard metropolitan statistical areas in New England are defined in terms of city and town boundaries rather than entire counties as is the case for such areas in other parts of the country. Accordingly, for this report, statistics were developed, instead, for certain groups of entire counties that make up Connecticut State Economic Areas A, B and C, Massachusetts State Economic Areas A, B and C, and Rhode Island State Economic Area A.

[5]Additional background for the consideration of such differences in the relative roles of local governments is available in the 1972 Census of Governments, Volume 5: Local Government in Metropolitan Areas. Table 5 of that report reflects a number of significant differences between governments in SMSA's and other areas, while table 8 presents data on local government employment and payrolls, by function, in each of the 264 SMSA's and their component counties as defined in 1972 by the U.S. Office of Management and Budget.

[6]Counties in the seven New England State Economic Areas are excluded since they either have no government operation or their government operations are of relatively small magnitude.

[7]The 68 county areas included in this table represent all county areas outside the 74 SMSA's whose July 1972 population was estimated at 200,000 or more.

INTERAREA COMPARISONS

Interarea comparisons of the data in this publication must be made with care. Two limiting factors especially need to be noted: (1) As more fully explained under Sources and Reliability of Data, the statistics shown are estimates subject to sampling variation; and (2) there are significant differences from State to State in the role of local governments relative to State governments in the administration and provision of particular governmental services, especially public welfare, highways, health, hospitals, and education.

SOURCES AND RELIABILITY OF DATA

Area data shown in this report were estimated from a random sample of local government units. The sample included all major local governments in the 74 largest SMSA's and 68 additional large counties. The sample also included all other governments whose relative importance in their State based on expenditure or debt was above a specified amount. A random selection of the remaining units was made from a compilation of all local governments within the SMSA's, other major counties, and the balance of the State, further grouped by type and size of government, using probabilities that were based on the ratio of each government's annual expenditure or indebtness to the State total.

The statistics in this report that are based wholly or partly on data from the sample are apt to differ somewhat from the results of a survey covering all governments but otherwise conducted using the same schedules and procedures. Estimates based on a sample survey are subject to sampling variability. The particular sample used in this survey is one of a large number of all possible samples of the same size that could have been selected using the same sample design. Each of the possible samples would yield somewhat different results. The standard error is a measure of the variation among the estimates from all possible samples and thus is a measure of the precision with which an estimate from a particular sample approximates the average result of all possible samples.

Estimates of standard errors of 1974 data for totals of full-time employees and full-time employee payrolls from the sample of governments in the 74 SMSA's listed in this report were found to be within 3.5 percent of the estimated figures for all but two SMSA's and less than 1.5 percent for 45 of these SMSA's. Sampling errors of the 1975 data are expected to be of the same order of magnitude since the same sample panel and same survey procedures were used in the 1974 and 1975 surveys. The 45 SMSA's that had a standard error of less than 1.5 percent are excluded from Table C which presents the results of the computation of standard errors for SMSA totals on a relative standard error basis.

A two-thirds confidence interval may be constructed in the following manner. The lower bound is obtained by subtracting one standard error from the estimate. The upper bound is obtained by adding one standard error to the estimate. Constructing intervals in this manner, we can say with two-thirds confidence that the interval for a particular sample will include the figure that would have been obtained from a complete census.

SMSA and county-area estimates reported for particular locally performed functions, are likely to have a larger sampling variability than their related aggregates. Estimates for components that make up a relatively minor part of local government totals in an SMSA or county area may be subject to particularly large variability, and should be interpreted with special caution.

Table C. Relative Standard Error of SMSA Totals of Full-Time Employees and Full-Time Employee Payrolls as a Percent of Estimated Total

Item	Area	Item	Area
Relative standard error of 1.5 - 2.4.....	Phoenix, Ariz.	Relative standard error of 2.5 - 3.4.....	Anaheim-Santa Ana-Garden Grove, Calif.
	Sacramento, Calif.		San Diego, Calif.
	Bridgeport, Conn.		San Francisco-Oakland, Calif.
	Chicago, Ill.		New Haven-West Haven, Conn.
	Gary-Hammond-East Chicago, Ind.		Jersey City, N.J.
	Boston, Mass.		Nassau-Suffolk, N.Y.
	Springfield-Chicopee-Holyoke, Mass.		Tulsa, Okla.
	Worcester, Mass.	Relative standard error of 3.5 - 4.5.....	San Jose, Calif.
	Detroit, Mich.		Youngstown-Warren, Ohio
	Grand Rapids, Mich.		
	St. Louis, Mo.-Ill.		
	Newark, N.J.		
	Buffalo, N.Y.		
	Oklahoma City, Okla.		
	Portland, Oreg.-Wash.		
	Northeast Pa., Pa.		
	Pittsburgh, Pa.		
	Houston, Tex.		
	San Antonio, Tex.		
	Seattle, Wash.		

As calculated for this report, the standard error also partially measures the effect of certain nonsampling errors but does not measure any possible systematic biases in the data.

For this annual survey usable replies were received from approximately 85 percent of the panel canvassed. For nonrespondent governmental units and agencies included in the panel, prior year data were utilized. Employee and payroll figures reported by local government officials were generally accepted as being substantially correct. In some cases, varying interpretations of the instructions or deficiencies in governmental employment and payroll records may make it difficult for officials to render complete and accurate reports for their governments. These difficulties are dealt with by (1) careful definitions of terms and detailed instructions in difficult cases (2) supplementary correspondence and telephone followup to officials, and (3) intensive examination of data collected—i.e., verification of internal consistency and comparison with previous reports, and other sources of data. Errors that may be introduced during processing (input preparation, etc.) are minimized through the use of intensive computer editing of the data at various stages of the processing system.

Persons desiring further information on estimation of sampling error of published statistics in this report may send inquiries to the Governments Division, Bureau of the Census.

This report is one of four recurrent annual publications based on a survey of government employment in October. One companion report, City Employment in 1975, presents data individually for 410 municipalities and major townships that had a population of 50,000 or more in 1973. The second companion report, County Government Employment in 1975, provides data for each of the 336 individual county governments that had a population of 100,000 or more in 1973 plus National and size-group totals for all counties. Public Employment in 1975 presents State-by-State data for all types of local government, as well as for State governments and the Federal Government. Volume 3, number 2 of the 1972 Census of Governments, Compendium of Public Employment, provides National and State-by-State figures on public employment in October 1972, together with additional geographic detail based on a canvass of all local governments. Volume 5 of the 1972 Census of Governments, Local Government Employment in Metropolitan Areas, provides data from a complete canvass of all local government employment and payrolls in the 264 SMSA's and their component county areas as defined in 1972.

Note: Because of rounding, detail may not add to totals. For information on relative sampling error of estimated data, see text, "Sources and Reliability of Data," page 3.

- Represents zero or rounds to zero. Z Less than half the unit of measurement shown. [1]The county area is served by an intercounty local government. See appendix for detail. [2]The cities of Manassas and Manassas Park are no longer included in the county area for Prince William County but their data are included at the SMSA totals.

Note: Because of rounding, detail may not add to totals. For information on relative sampling error of estimated data, see text, "Sources and Reliability of Data," p. 2.

- Represents zero or rounds to zero.
Z Less than half the unit of measurement shown.
[1]The county area is served by an intercounty local government. See appendix for detail.
[2]The cities of Manassas and Manassas Park are no longer included in the county area for Prince William County but their data are included at the SMSA totals.

Note: Because of rounding, detail may not add to totals.

- Represents zero or rounds to zero. Z Less than half the unit of measurement shown. [1]Includes data for an institution of higher education operated by the local government. [2]Data are for October 1974. [3]Education data are for October 1973. [4]Noneducation data are for October 1973. [5]Education data are for October 1974. [6]Noneducation data are for October 1974. [7]Excludes data for custodial helpers in New York City public schools. Custodial helpers are contractors' employees but were reported in prior years as city employees; there were 7,683 custodial helpers earning a total of $6,039,000 in October 1975. [8]Because of Census Bureau classification procedures, the employees providing police for the Port Authority of New York and New Jersey have been prorated among the functions shown. For purposes other than this report however, it is possible to identify the police protection employment and payrolls for October 1975: Full-time equivalent employment, 1,325; payroll, $1,956,244. [9]Employees of Cleveland Public Library, a part of Cleveland City School District, are shown at libraries instead of education as is the case for other school library employees.
